

Team Project: My IMDB

Create your own IMDB

- Implement functionality both for regular (unregistered) users, and for editors
- Use the “Movies API”
- Pages that the app should have:
 - All users:
 - Homepage
 - Search page
 - Movie details
 - Private collection editor
 - All movies
 - Include add and delete movie functionality
 - Edit movie
- “Special” functionality
 - Include pagination on search page
 - Add filters on the search page and save them in local storage / cookies

Process

- Create accounts on <https://asana.com/>
- Split in two teams (each team has the same tasks)
- Do a planning session together, in order to:
 - Determine the tasks that are needed
 - Assign tasks for people
